

REFURBISHED
EQUIPMENT

Factory reconditioned backed with a 1 year warranty

Isoloader refurbished machines are reconditioned in our factory to be provide our customers with an "as new" experience.

Original warranty on parts: refurbished machines are sold with a one year warranty on parts, which is the same warranty period as we supply on our new equipment. Warranty on labor is not included and Isoloader's normal warranty conditions apply.

Factory refurbishment: all work is done by Isoloader in the same factory and by the same people that built the machine in the first place.

Rebuilt as new, look like new: each machine is dismantled and thoroughly inspected. The structure is sand-blasted and checked for structural damage and fatigue before being repainted in accordance with our specification. Worn, leaky or damaged parts are replaced. Wear pads and wire ropes are replaced. During reassembly, the machine is given the same tests and quality checks as a new machine plus a full service prior to shipping. Please note that for some machines, according to their application, full testing including load testing may only be completed during commissioning on-site.

Full support and training: every refurbished machine is fully supported by Isoloader, including installation and commissioning, training and after-sales support.

Spare parts: each machine is provided with a spare parts kit for service and scheduled maintenance during the warranty period.

Isoloader is a leading manufacturer of container and heavy load handling solutions for operations handling between 100 and 100,000 loads per year. We offer a free logistics service to assist in your planning. Call us—we can help.
